DAILY FEEDING GUIDELINES - Sudden changes in diet can sometimes result in digestive disturbances. Overfeeding is a common cause of digestive upset. Do not overfeed regardless of your pet's acceptance and eagerness. Always introduce any new diet over a period of 5 to 7 days, mixing increasing amounts with the present diet. Keep fresh water available at all times and offer plenty of exercise.

These projected feeding amounts are ONLY GENERAL GUIDELINES, based on data sourced from the "Nutrient Requirements of Dogs and Cats Animal Nutrition Series, National Research Council of the National Academies." Individual requirements will also vary based on specific metabolism, daily activity, age, genetics, health status, environment, outdoor temperature and other factors.

For best results, refer to your custom profile online for feeding guidelines.
